1. Introduction

The Process Design Document describes the business process selected for automation using UiPath Robotic Process Automation (RPA). The automation uses Computer Vision activities to interact with the UiBank website and perform loan application processing automatically. The objective of this automation is to: Reduce manual effort Improve processing speed Increase accuracy Demonstrate end-to-end UiPath CV automation

2. AS IS Process Description

Process Full Name	UiBank Loan Application Automation
Function	Loan Application Processing
Department	Banking
Process Description	Automates loan application submission using UiPath CV activities
Role Required	RPA Bot
Process Schedule	On Demand
Average Handling Time	2-3 Minutes
Applications Used	UiBank Website, UiPath Studio

2.1 High Level Process Diagram

1. Open UiBank Website
2. Login using Username and Password
3. Navigate to Apply For A Loan
4. Fill Loan Application Form
5. Submit Loan Application
6. Verify Loan Approval Status
7. Highlight Loan Approval/Rejection

2.1 High-Level Steps to Build this Project

1. Login to the UiBank website by capturing the Username, Password, and Sign In UI elements.
2. Scroll down the webpage and capture Apply For A Loan button.
3. Navigate to the next page and capture Apply For A Loan button again.
4. Fill the Loan Application Form using CV activities and submit the application.
5. Highlight the section where the Loan is Approved or Rejected.

2.2 Detailed Steps

Login Sequence

1. Create a new Process, assign a meaningful name, and add a description.
2. Rename the default Sequence workflow to UiBank_Login and add annotations.
3. Add a CV Screen Scope activity and indicate the webpage <https://uibank.uipath.com/>.
4. Store credentials using Windows Credential Manager.
5. Open Windows Credential Manager and add Generic Credentials with Email and Password.
6. Add CV Type Into activity to enter Username and Password.
7. Add CV Click activity to click the Sign In button.

Welcome Page1 Sequence

1. Create a new workflow named UiBank_Welcome1.xaml.
2. Add a CV Screen Scope activity and indicate the webpage.
3. Add a CV Click activity to click Apply For A Loan button.
4. Use Delayed Screen Refresh to scroll webpage while indicating elements.

Welcome Page2 Sequence

1. Create a new workflow named UiBank_Welcome2.xaml.
2. Add a CV Screen Scope activity and indicate the webpage.
3. Scroll webpage upward using Delayed Screen Refresh.
4. Add CV Click activity to click second Apply For A Loan button.

Application Form Sequence

1. Create a new workflow named UiBank_ApplicationForm.xaml.
2. Add a CV Screen Scope activity and indicate the webpage.
3. Use CV Type Into activity to enter applicant details.
4. Use CV Dropdown Select activity for dropdown fields.
5. Create required arguments in Argument panel.
6. Click Submit Loan Application button using CV Click activity.

Loan Approved Or Not Sequence

1. Create a new workflow named UiBank_LoanApprovedOrNot.xaml.

2. Add a CV Screen Scope activity and indicate the webpage.
3. Add CV Highlight activity to highlight Loan Approved or Rejected section.

2.3 Detailed Process Mapping

Step	Action Description	Expected Result	Remarks
1.1	Open UiBank website and indicate CV Screen Scope	UiBank webpage displayed	Use Chrome or Edge browser
1.2	Retrieve credentials from Windows Credential Manager	Credentials fetched securely	Use Get Secure Credential
1.3	Enter Username and Password using CV Type Into	Credentials entered	Password masked
1.4	Click Sign In button	User logged in successfully	Handle invalid login
2.1	Scroll webpage and click Apply For A Loan	Navigate to Welcome Page 2	Use Delayed Screen Refresh
3.1	Click second Apply For A Loan button	Loan form displayed	Verify page loaded
4.1	Enter Name, Age, Income, Loan Amount, Address	Form fields completed	Validate required fields
4.2	Select dropdown values and submit form	Loan application submitted	Wait for response
5.1	Highlight Loan Approved or Rejected message	Result highlighted	Final validation
